

India's new energy BMS battery management system

Will BharatBMS work with energy storage and EV manufacturers?

Starting January 2025, we will be working with energy storage and EV manufacturers to integrate BharatBMS into their products. This collaboration will help standardize battery management across the industry while allowing OEMs to focus on their core strengths in battery and system development.

What is BharatBMS?

BharatBMS is India's first universal high-voltage Battery Management System (BMS architecture) up to 800 volts for EVs and energy storage that scales effortlessly from home applications to industrial installations and EVs. It's as effective in a 5kWh home backup system as it is in megawatt-scale battery packs.

What is Xbattery's new BMS Tech?

Xbattery's new BMS tech enhances battery life, efficiency, and safety, driving innovation in India's energy storage sector. Hyderabad startup unveils indigenous battery tech promising longer life and efficiency.

Why is Xbattery launching BharatBMS?

Satish Reddy, Founder & CEO of Xbattery, stated, "Indigenously developed, reliable and affordable energy storage is pivotal for India's transition to clean power. BharatBMS was developed with the unique challenges of India in mind, whether it's a household dealing with frequent power cuts or a solar farm aiming to optimise energy storage."

Who is Indi Battery Management System?

We are India's largest manufacturer of advanced Battery Management Systems (BMS) for lithium-ion batteries. We built a robust R&D division to thoroughly drive the innovation and development of smart battery management systems. We have applied for more than 20 patents.

What industry is battery management systems a part of?

Battery Management Systems forms part of the Energy industry, which is the 14th most popular industry and market group. If you're interested in the Energy market, also check out the top Energy & Cleantech, Renewable Energy, Recycling, Oil & Gas or Energy Efficiency companies. We are handcrafting unique design & digital experiences to surprise you!

BharatBMS integrates advanced thermal management, real-time monitoring, adaptive cell balancing, remote diagnostics, and safety features. ...

Xbattery has announced the official launch of BharatBMS, a high-voltage Battery Management System (BMS) designed to solve energy storage challenges in homes, factories, ...

India's new energy BMS battery management system

Xbattery has announced the official launch of BharatBMS, a high-voltage Battery Management System (BMS) designed to solve energy storage ...

Xbattery, an energy storage solutions innovator based at T-Hub, Hyderabad, has officially launched BharatBMS -- a high-voltage Battery Management System (BMS) designed ...

The Brain of the Battery power -AI Intelligent, patented, state of art battery management system built using advancements in software & hardware to ...

This Intelligent energy management system "ARAI-eMi4" is a complete software and hardware platform comprising of advanced algorithms for energy management and an automotive ...

Our ecosystem offers everything you need to optimize and configure your battery's performance and streamline your operations from real time analytics ...

Xbattery, an energy storage solutions innovator based at T-Hub, Hyderabad, has officially launched BharatBMS -- a high-voltage Battery ...

Battery management systems (BMS) enhances the performance and ensures the safety of a battery pack composed of multiple cells. Functional safety is critical as lithium-Ion batteries ...

The Battery Management System (BMS) industry in India is influenced by several key factors that potential stakeholders should consider. Regulatory frameworks are evolving, with the ...

MESPL's flagship product is the company's smart Battery Management System (BMS) which enables OEMs/Battery Makers to deploy safe, reliable, and ...

Detailed info and reviews on 12 top Battery Management Systems companies and startups in India in 2025. Get the latest updates on their ...

What is a Battery Management System (BMS)? A Battery Management System (BMS) is integral to the performance, safety, and ...

BharatBMS integrates advanced thermal management, real-time monitoring, adaptive cell balancing, remote diagnostics, and safety features. These capabilities ensure ...

Battery Management Systems (BMS), the "brain" that keeps batteries safe and efficient in EVs and energy storage. Discover how BMS prevents overheating and extends battery life.

BharatBMS is India's first universal high-voltage Battery Management System (BMS architecture) up to 800

India s new energy BMS battery management system

volts for EVs and energy storage that scales effortlessly from home applications to ...
