

# Madagascar Distributed Energy Storage Project

How does the private sector provide energy and digital services in Madagascar?

With the exception of the national electricity company JIRAMA, energy and digital services in Madagascar are provided by the private sector. Low population densities and high poverty levels in most of the underserved areas make it impossible for the private sector to deliver these services on a purely commercial basis.

How will Madagascar's new telecommunications project impact the world?

The project will also enable 3,400,000 new internet users and connect some 2,000 health centers and schools to renewable energy and digital services. " Access to energy and telecommunications are top priorities for our government. This project is fully aligned with our vision for the development of Madagascar.

Why should Madagascar invest in energy & telecommunications?

" Access to energy and telecommunications are top priorities for our government. This project is fully aligned with our vision for the development of Madagascar. It will allow a significant increase in our access to energy and digital services," said Andry Rajoelina, President of Madagascar.

What is the Madagascar integrated energy access planning tool?

The Madagascar Integrated Energy Access Planning Tool is an online, publicly available, interactive, and user-friendly data visualization platform that equips Madagascar's policy makers and energy practitioners with data and insights to make informed decisions on strategies and operations to advance energy access in the country.

What is the integrated perspective on energy access?

This analysis represents a truly integrated perspective on energy access, incorporating the requirements for universal least-cost residential and institutional electrification, access to clean cooking, and electrification of cold chains that the health, agricultural and fishery sectors rely upon to preserve medicines and food.
