

How will a new solar plant help Macedonia?

Andi Aranitasi, EBRD Head of North Macedonia, said: "The new solar plant will help the country, which faces severe air pollution from coal, to reduce its reliance on ageing coal-fired infrastructure. It will also generate cheap electricity in times of very high market prices.

Who built the first solar plant in North Macedonia?

The 10MW solar plant, built on the site of the spent Oslomej lignite coal mine, was constructed by the public company JSC Elektrani na Severna Makedonija (ESM). This is the company's first solar plant in North Macedonia, developed with a view to diversifying energy sources and supporting decarbonisation.

How much electricity will North Macedonia produce a year?

This means that if only a half of these priority locations were built out, they could produce 7.7 terawatt-hours of electricity per year--which exceeds North Macedonia's current electricity consumption and could even fully cover the estimated electricity consumption in 2030 under the energy efficient scenario of the NECP.

Should North Macedonia accelerate the transition to renewables?

Like others in the region, North Macedonia must balance its need to rapidly accelerate the transition to renewables to secure its energy future with the need to ensure that future is one where both the country's nature and people thrive.

Is North Macedonia a good place to invest in green energy?

Dimitar Kovacevski, Prime Minister of North Macedonia: "It is really a great pleasure to be here today, where once a big environmental polluter was located and now we are producing green energy. The benefits of this investment are manifold.

Does North Macedonia need a coal phase-out?

Even though the country has historically been dependent on lignite coal mining for around 30% and gas imports for an additional 15% of its electricity production, it has nonetheless set very ambitious goals for decarbonization. As part of the Powering Past Coal Alliance, North Macedonia has committed to a coal phase-out by 2027.

This is the company's first solar plant in North Macedonia, developed with a view to diversifying energy sources and supporting ...

North Macedonian power utility Elektrani na Severna Makedonija obtained a loan for the construction of solar power plant Bitola 2 and the expansion of its Bogdanci wind farm. ...

The Bitola 2 solar power plant is part of North Macedonia's efforts to increase the share of renewable energy

in its grid. This facility will be built ...

The results of the study are unambiguous: North Macedonia has an enormous untapped potential for renewable energy development. Even when completely excluding all ...

North Macedonia is rapidly expanding its solar energy sector, with photovoltaic (PV) systems now contributing 10% of the country's electricity production.

As North Macedonia accelerates its renewable energy adoption, solar system enclosures have become critical components for safe and efficient power generation. This article explores ...

Our largest solar power plant has started production Operations start at GEN-I's second large solar power plant in North Macedonia . With a total power of 12 MW, the plant will generate up ...

This is the company's first solar plant in North Macedonia, developed with a view to diversifying energy sources and supporting decarbonisation. It is expected to produce nearly ...

A 62MW solar power plant is being built in the Oslemej region of North Macedonia, and we are supporting this project with our 104MWh energy storage solutions. This initiative will ...

With a total installed capacity of 79,882 kilowatt-peak (kWp), the plant generates 120 million kilowatt-hours (kWh) of electricity annually. The ...

A pivotal moment occurred in 2020 with the launch of the first significant solar plant, and by 2023, North Macedonia had experienced a 251% increase in solar capacity, ...

The battery energy storage system (BESS) is set to become operational in the second half of this year. It will help enhance the reliability ...

- In North Macedonia, one of the largest solar power plants in the region is being built on the site of a former coal mine in Oslomej - the project has been identified by the Western ...

Renalfa IPP is building a solar power plant in the REK Oslomej coal complex in North Macedonia under a public-private partnership. It obtained financing from the Green for Growth Fund.

The 10MW solar plant, built on the site of the spent Oslomej lignite coal mine, was constructed by JSC Elektrani na Severna Makedonija (ESM), ...

North Macedonia's energy sector is undergoing a quiet revolution. With growing demand for renewable integration and grid stability, container energy storage systems (CESS) have ...

North Macedonia Solar Power Container
