

Togo Communication Base Station Wind Power Infrastructure Construction Project

Which companies are using togocom & Vivendi Africa's electricity towers?

These include TogoCom and Group Vivendi Africa agreement with the national electricity distribution company CEET(Compagnie Energie Electrique du Togo),to use the electricity towers for last mile delivery of broadband services.

How many HV transmission lines will Togo have to build?

The LCPDP that was financed by TESSIP has identified eight HV transmission lines that Togo will have to develop to reach its 2030 electrification goals. This component will finance the construction of a total of about 262 km of 161 kV transmission lines of which 134 km between Davie-Atakpam and of 128 km between Lom and Kpalim.

Can Kékéli transform the energy landscape in Togo?

Togo,like many other West African nations,has struggled with energy shortages and unreliable power supplies. The Kékéli project,with its focus on efficiency and sustainability,is poised to transform the energy landscape in Togo.

What is Kékéli Efficient Power in Togo West Africa?

Kékéli Efficient Power in Togo West Africa utilizes a modular plant design,which allows for scalability and flexibility. This design enables the project to expand its capacity easily to meet future energy demands without significant disruptions to existing operations.

Is Togo a country?

The Republic of Togo is a small state of 57,000 kilometers square (km²) in West Africa bordered by Ghana to the west,Benin to the east,Burkina Faso to the north,and the Gulf of Guinea to the south. A small country of approximately 7.8 million people and only 100 km wide,Togo is comprised of over 30 ethnic groups and numerous local languages.

Is Togo doubling broadband penetration by 2021?

GoT has awarded two new Internet Service Providers (ISP) licenses in 2017 and has privatized the incumbent operator Togocom in 2019 (GoT retains a minority stake of 49%). Given the development trends of the broadband market,Togo is on track to doubling broadband penetration by 2021.

SunZia Wind and Transmission together will create the largest clean energy infrastructure project in United States history. The project will harness and deliver renewable energy, power critical ...
